

Announcement of CLIMA 2016, 12th REHVA World Congress

 Participate in the 12th REHVA World Congress CLIMA 2016 – the leading international scientific congress in the field of Heating, Ventilating and Air-Conditioning (HVAC) in Aalborg, Denmark in May 2016. CLIMA 2016 is a congress for all stakeholders in the building sector as it deals with the full life cycle of buildings and their HVAC systems from design specification to demolition and reuse. CLIMA 2016 will focus especially on energy efficient building and HVAC system performance in practice both in relation to fulfilment of the intended design, in relation to their ability to fulfil the needs of the occupants and interact with the users' daily practice as well as in relation to their role in the future smart energy system. CLIMA 2016 is now open for the submission of abstracts. We invite all experts to present their work and exchange views and ideas. The congress topics are listed on the website. If you wish to present a paper, an abstract should be submitted electronically and should provide suitable information to allow the significance and quality of your work to be determined. Review criteria include originality, scientific/technical quality of the results, and relevance to the conference. The deadline for abstract submission is November 30, 2015. Please upload your abstract at the website, following the instructions given. Make sure to read the requirements for abstracts before submitting.
