

# International Sustainable Built Environment Conference

28–30 January 2014 | Doha, Qatar

**Conference Chair:** Professor Fariborz Haghighat  
*Concordia Research Chair – Energy & Environment, Concordia University, Canada*

Part of Green Building Expo 2014 (the region's largest conference and exhibition for sustainable solutions in the built environment), ISBE will address the latest research and developments in sustainable building design.

Papers are invited for presentation in parallel sessions at the conference on the following core topics:

- Energy efficiency, renewable sources and high performance systems
- Water recycling, management and reuse
- Architectural practices, innovations and passive designs
- Materials recycling, reuse and manufacturing for efficient performance
- Urban planning for human comfort and mitigation strategies for climate change
- Indoor environment and human health
- Management and operations in the real-estate industry
- Infrastructure resilience and structural integrity in construction

**Authors should submit abstracts for oral and poster presentations by 6 September 2013**

## Invited speakers include:

**Francis Allard**, *La Rochelle University, France*

**Shinsuke Kato**, *University of Tokyo, Japan*

**John Little**, *University of Sydney, Australia*

**Zoubir Lounis**, *National Research Council of Canada, Canada*

**Torben Sigsgaard**, *Aarhus University, Denmark*

**Hiroshi Yoshino**, *Architectural Institute of Japan, Japan*
